

WHERE THERE'S HEALTH, THERE'S HOPE.

Imagine losing everything, your home, your loved ones, your peace of mind. Now imagine having to deal with all that while in a foreign country. This is what refugees live with on a daily basis. The office of the United Nations High Commissioner for Refugees has worked tirelessly to protect refugees and their rights, and now in partnership with UNHCR, GlobeMed Lebanon will facilitate Syrian refugees' access to medical attention and care. As they say in the region, "Everything is bearable as long as there is health."
